Ecology and molecular characterization of *Neozygites tanajoae* (Entomophthorales: Neozygitaceae) a fungal pathogen of the cassava green mite

By Bonaventure Aghoton

Cuvillier Verlag Mrz 2009, 2009. Taschenbuch. Book Condition: Neu. 212x147x9 mm. Neuware - For the biological control of the cassava green mite (*Mononychellus tanajoa*, Bondar), Brazilian strains of the entomopathogen *Neozygites tanajoae* were recently introduced into Africa to improve the control achieved by predatory mites. In order to monitor the establishment of the Brazilian strains two PCR primer pairs, NEOSSU_F / NEOSSU_R and 8DDC_F / 8DDC_R were tested on *N. tanajoae* strains collected from several locations in Brazil and from three countries in Africa, Benin, Ghana and Tanzania. The first primer pair enabled the species-specific detection of *N. tanajoae*, while the second differentiated the Brazilian isolates from those of other geographical origin. The results confirmed that the two primer pairs tested are suitable for the detection of *N. tanajoae* and the differential identification of Brazilian and African strains. PCR can therefore be used to monitor the establishment and spread of the Brazilian strains in Benin and in other African countries where they have been introduced recently in order to improve cassava green mite (CGM) control. In this work the establishment and spread of Brazilian strains of *N. tanajoae* were followed in a countrywide survey in Benin in which a total of 141 cassava fields were inspected. Samples of *M. tanajoa* suspected of being infected hv...

Reviews

The ideal publication i possibly go through. I was able to comprehend every thing out of this published e publication. I am delighted to explain how this is actually the finest pdf i have got read inside my personal existence and could be the very best ebook for possibly.

-- **Roberto Friesen**

This written book is excellent. It typically is not going to price a lot of. I found out this book from my dad and i encouraged this book to discover.
